WEDNESDAY, APRIL 8, 1896.

PACIFIC COAST IRE.

Although inaccurate in its information as to what the Hawaiian Legislature is doing, the Seattle Post Intelligencer's article reproduced elsewhere conveys a useful, if not a presently needed, warning. The Legislature must be extremely careful how it deals with any matter affecting the trade between the Pacific Coast and these islands. Business men here, also, in their own long-run interests, ought to be cautious, not snapping at every seeming opportunity to better their profits by buying in markets other than where our producers do practically all their selling. At the same time our public men and press ought, on every fit occasion, remind our American friends of what this country has been doing, out of the ordinary, to enhance the intimacy of commercial relations between the two countries. For many years the government of Hawaii has been paying liberal subsidies to American steamers plying between San Francisco and Honolulu, which get no such assistance from the Government of the United States. Our Legislature has also gone ahead of the United States Congress in substantial promotion of cable communication. Again, the inconsistency may be indicated by papers, like the San Francisco Chronicle for instance, which, after strongly advocating the annexation of Hawaii, are ready to berate our public men upon the slightest suspicion that they are going to hurt American interests in their efforts to find the wherewithal for conducting the government of this little republic. Why have those journals abandoned their text, and with it their concern for what they were wont to call "the brave American colony at Honolulu?"

There was a great demonstration at Winnipeg against the Dominion Government's Remedial bill for forcing separate schools on Manitoba.

That Minstrel Show.

This morning's Advertiser stated that the coming minstrel show would be for the benefit of the performers. This is not true. The performance will be solely for the benefit of Company D. The receipts and expenses of the last performance were about equal, not over \$5 net being realized. At the coming show the expenses will not be nearly as large and the receipts ought to be much larger than they were last time. New songs and specialties will be introduced, also a new afterpiece. Taken all in all the boys ought to and undoubtedly will give a much finer performance than before.

Dimmick, the great elephant catcher, says that it is declared on good authority that but twenty-four white elephants have been caught since the commencement of the Christian era.

The Cough Which Lingers

Is going to cause serious trouble. You can not afford to let a cough linger. Perhaps you have tried remedies which afford you no relief. You begin to wonder if your cough is curable.

Now Putnam's Cherry Cough Comfort is one of the most sure and certain remedies for coughs and colds. The first dose will afford relief. It will certainly cure your cough if it's possible to cure it. This remedy is pleasant and safe to take. Children take it readily. Get a bottle today of

THE WORLD HAS NEEDED IT!

THE WORLD HAS WAITED FOR IT!

THE WORLD CAN NOW HAVE IT!

HERE IT IS!

A phenomenal stove that burns common Coal Oil (kerosene) with a blue flame without odor.

The wonderful "NEW PROCESS" BLUE FLAME COOKING STOVE, which three years of careful testing has proven to be wholly practicable. Burns coal oil (kerosene) from a wick, which will last a year, producing an intensely hot blue flame, like coal gas—without odor—never smokes as the wick cannot be turned too high. Absolutely non-explosive. All parts durable and interchangeable. Requires no more care than the ordinary house lamp.

This is a stove that admits of drawing the fluid for light and heat from the same barrel or tin. It is the most economical stove in the world and you cannot afford to be without one.

The difficulty in the past with all coal-oil stoves has been that the means at hand were entirely inadequate for the results desired. The flame being in all cases a yellow or illuminating flame, made it impossible to place the article or utensil in direct contact with it. As a result the time occupied in cooking or baking was so long that it was distressingly irksome and unsatisfactory. Again with the old style illuminating flame oil stove there is always the liability of the flame creeping up after the burner is lighted, sooting everything over it and sending forth a volume of smoke and odor into the room. A decidedly disagreeable occurrence, but what everyone has experienced who has operated the old style stoves.

The wonderful "New Process" Blue Flame Oil Cook Stove, has a powerful blue flame absolutely odorless. Any utensil or flat iron may be placed directly in the flame without a particle of soot being deposited upon it. By the use of the simplest device it is impossible to turn the wick too high, thus insuring a perfect flame at all times when in operation. Possibly the most positive proof of the success of this stove is the result obtained in baking. The inside measurements of the oven on the "New Process" Blue Flame Oil Stove are 19 1-2 inches wide, 12 inches deep and 13 1-2 inches high. With this large oven it is possible to cook as perfectly and quickly as in any coal, gas, or gasoline range. The use of coal oil (kerosene) is so general that every household is provided with it; hence there is no annoyance in the matter of procuring fuel in any locality.

Results of Honesty.

"My watch is giving me the utmost satisfaction; I actually believe it does not vary a second during the week."

Pleasant remarks these. Just the kind of balm a watchmaker needs occasionally to keep up his spirits. For you know working all day on a high stool, a glass firmly screwed into one eye, looking at objects so minute it takes a microscope to distinguish them, is not the pleasantest occupation which could fall to the lot of man.

So it's no wonder a fellow gets all out of sorts occasionally, and then it's the time a few remarks like the above does what all the patent medicine in the world could not accomplish, cheers up, makes things look brighter, the next job goes all the smoother.

Speaking of the above watch: It was an old one. The wearer had used it steadily for forty years. It had run enough; had revolved its wheels so long and steadily, that at last it was tired out. The pivots were so worn, the wheels just wobbled and wobbled, then stopped altogether. What was to be done? Throw it away? Get a new one. Yes, but the wearer valued it for its associations, it was as dear to him as his best friend; so nothing would do but build it all over as it were, renew the parts, put some go into it. That we accomplished it to the entire satisfaction of the owner, his remarks above would surely leave no room for doubt. And we can do the same with yours, sometimes they go a little too far, and the cost for reconstruction is too much, but generally no work is too intricate for us. It is that which we brag about, complicated work is our stronghold. Isn't it reasonable now to suppose that we are better able to do your less intricate work? Wouldn't it be safer to give us the custody of your watch altogether, no matter what the trouble, and have a feeling of certainty as to its treatment?

Auction Sales by Jas. F. Morgan.

COFFEE ESTATE AND LANDS For Sale.

I am directed to sell at Public Auction on

Wednesday, May 27, '96, at 12 o'clock noon of said day at my sales rooms on Queen street, in Honolulu (unless sooner disposed of at private sale) the following described property, namely:

A tract of land of about 2,300 acres in fee simple situated at Kolo and Ololoa in the South Kona, Island of Hawaii, about eight miles by a good road from Hilo, one of the largest villages in Kona. There is an excellent landing on the land itself from where the coffee and other produce could be shipped and a good site for a mill near the landing. Fifty acres of land are in coffee. Roughly estimated there is about seven hundred acres of splendid coffee land lying all on one block on both sides of the Government Road. Eight hundred acres lying above and to the East of the seven hundred acres above mentioned is also excellent land and although at a higher altitude is no doubt also well adapted for coffee culture. The lower land below the coffee belt is suitable for pineapples and sisal. There is a drying house, store and work-rooms, a Gordon's Pulper, laborers' quarters and water tanks at the plantation, and the land is partly wooded. There has never been any blight on this land, although coffee was planted a great many years ago. Old residents of Kona like the late D. H. Nahu, J. W. Kualiokua and others have testified to this fact. There is a sea fishery appurtenant to Ololoa.

Terms cash or part of the purchase price can remain on mortgage at eight per cent per annum. Deeds and stamps at the expense of purchaser.

A map of the property can be seen and further particulars obtained at my sales rooms.

J. F. MORGAN, Auctioneer.

General Merchandise and Commission Merchants.

W. W. DIMOND'S

What with riots among people of one nationality and legislative action on the evils ensuing from the immorality of the females of another race and the sinfulness of people who persist in shooting at targets within the three mile limit, moral Honolulu has been thrown into such a pretty kettle of fish that is a question if even an extra session of the Legislature can pull us out of it.

Who would have thought that this Paradise of the Pacific could have been so suddenly turned into a modern Sodom and Gomorrah? If this keeps up the people will fall short of the time necessary to look at the bargains we offer in Table Glassware.

We carry six distinct stock patterns of engraved and cut glasses from which single glasses or dozens may be had at any time. The sets range from the petite liqueur glass to a finger bowl, and the price varies from fifty cents a dozen up to that which most pleases the economical woman.

Ours is the tumbler store.
